## WEEK 2 CHALLENGE >>>

A HomeScouting  
Adventure

ZoomOut and see more stars with your telescope as you explore the night sky and discover what lies beyond. Thousands of stars, constellations, planets, the moon, satellites, airplanes, and birds are above your head every night. Have a Star Party with your family for this week's challenge and identify what you see.

Did you complete this week's challenge?      YES      NO

Other Connected Advancement	Completed?
<b>Adventures in Science – Elective Adventure</b> <b>Req. 2.</b> Visit a museum, a college, a laboratory, an observatory, a zoo, an aquarium, or other facility that employs scientists. Prepare three questions ahead of time, and talk to a scientist about his or her work.	
<b>Adventures in Science – Elective Adventure</b> <b>Req. 3c.</b> Build a model solar system. Chart the distances between the planets so that the model is to scale. Use what you learned from this requirement to explain the value of making a model in science.	
<b>Adventures in Science – Elective Adventure</b> <b>Req. 3d.</b> With adult supervision, build and launch a model rocket. Use the rocket to design a fair test to answer a question about force or motion.	
<b>Adventures in Science – Elective Adventure</b> <b>Req. 3b.</b> Study the night sky. Sketch the appearance of the North Star (Polaris) and the Big Dipper (part of the Ursa Major constellation) over at least six hours (which may be spread over several nights). Describe what you observed, and explain the meaning of your observations.
